

Fee shifting: American to British

Both players remain risk neutral; costs unchanged at multiplier 1.

Changed decisions only. Original: American; target: British.

Decision	Signal	Original	Target	Change	Direct	Entry	Offers	Exit
Plaintiff								
File (%)	0.25	87.83	100	+12.17	+12.17	0	0	0
Demand / continue	0.35	0.75	0.05	-0.70	-0.70	0.00	0.00	0.00
Demand / continue ^{†*}	0.65	0.85	0.95	+0.10	Selection-dependent			
Defendant								
Answer (%)	0.65	8.29	0	-8.29	-8.29	0	0	0

Direct: rule/preferences first. Entry, Offers, Exit: opponent contributions, averaged over six replacement orders. Four contributions sum to Change, before rounding.

Probability changes are percentage points; pure demand/offer changes are fractions of damages. Mixed offers are shown as action probabilities, not averages.

†: tie-sensitive allocation. *: sensitive to an unvisited opponent policy. ‡: a conditional policy at an intermediate history not reached in that hybrid. Selection-dependent: the original-preserving optimal response does not reproduce the target action/mix; no four-way allocation is claimed. Undefined counterfactual: no opponent-and-chance reach.

2 histories no longer reached; 0 newly reached. These have no comparable endpoint action and are omitted. Detailed diagnostics accompany the table.
